DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 5, 8, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Baker et al..

The patent to Baker et al. shows a device for lifting a wire rack comprising a stabilizing member (15,16) that can be considered “flexible” since it is resiliently biased by spring (18), a T-shaped hook member (17), and a handle (12,22). Regarding claim 5, the four corners of the stabilizing frame (15) are rounded or “arcuate”.

3. Claims 1, 5, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Silvey.

Silvey shows a lifting device comprising a flexible stabilizing member (B', B), a hook member (C), and a handle (A). It is pointed out that Silvey's lifting device contains all of the *structural* limitations as broadly as recited in the above claims and is deemed capable of lifting a wire rack if positioned properly thereon.

Allowable Subject Matter

4. Claims 2-4 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The Noe et al. patent shows a wire grill rack lifting tool having a cleaning brush attached thereto.
